

automobiles went has not yet been learned.

Mr. Lyons telegraphed to Chief of Detectives Horton in Providence that one of the machines was headed that way. The chief sent his men out to stop the automobile, but it has not been seen.

The warrant against Constable Charles charged assault. The constable was arrested by Justice of the Peace Edgar B. Watts in Mr. Lyons's office and was held in \$200 bail, which was furnished by Mrs. Louis A. Briggs.

Young Lyons is a summer resident of the Pier. Mr. Cutting is a son of Louis Cutting of Trowbridge road.

TROUBLED CUBAN POLITICS.

Last Member of Gomez's Original Cabinet Gets Out. New Factor in Primaries.

HAVANA, Aug. 7.—In consequence of the row which broke up last Monday night the fusion convention presided over by Diaz Villegas, Secretary of the Treasury, President Gomez has issued an order forbidding members of the Cabinet from holding any office at a political gathering. Those who hold positions of prominence in political organizations are told to resign.

In consequence of this Villegas resigned from the Cabinet to-day. As he was the sole surviving member of the original Gomez Cabinet, the President strove to get him to reconsider his determination to get out, but he was obstinate.

This has widened the breach which already exists in the Government and has encouraged the Conservatives to take part in the primaries. As a result President Gomez has postponed his return to his summer home at Cayo Cristóbal.

SHOOTING NEAR DYNAMITE.

When Warned Away Young Man Shot the Watchman.

John Nelson of 94 Fleet street, Jersey City, who is employed by the Millard Construction Company as a watchman at a dynamite magazine located on the meadows near the western end of the Erie Railroad cut through the Bergen Hills, was shot early yesterday morning with a Flourent rifle by one of two young men whom he had ordered to get out of the place. The shooting was in a place less than a mile from the dynamite magazine.

When Nelson ordered them to stop shooting the two young men began the chase of him and began to abuse him. He fired a shot into the air with his revolver to frighten them. One of them took aim at the watchman, but he fell away with a bullet in his groin. The men ran away. The firing of Nelson's revolver had been heard in the Erie freight yards and several engineers and firemen came to his aid. His wound was not serious and he was rushed into the terminal in Jersey City on a locomotive. An ambulance was called from St. Francis Hospital. There the surgeons were unable to find the bullet, but declared the case not to be serious. Later in the day Nelson went home with his wife.

Detectives Sergeant William Maxwell arrested James Young, 29 years old, of Manhattan and Tonnele avenues and William Sprick 23 years old, of 6 Reserve avenue on suspicion of the shooting of Sprick as the one who had shot him.

BEATEN, TAKEN TO HOSPITAL.

A Tale of Midnight Assault Under the Williamsburg Bridge.

Two men supporting a third rang the night bell at the Eastern District Hospital, Williamsburg, at 2 o'clock yesterday morning and told Dr. Gurtov who was awakened, that they had found the man lying in a pool of blood under the Williamsburg Bridge at Bedford avenue and South First street and that he appeared to be seriously hurt. Dr. Gurtov took the man into the ambulance room and found that he had a deep scalp wound, his left ear was almost severed from his head and he had bruises all over the face and body. After dressing the man's wounds Dr. Gurtov questioned him.

The man said that he was Daniel J. Cannon, 26 years old, and lived at 99 South 10th street. He said that he was going home when he was attacked by three men under the Williamsburg Bridge. Whether it was for the purpose of robbery Cannon could not say, but he said that the assailants snatched up behind him and he first knew was when he was struck a hard blow behind the left ear. He remembered the dropping of the assailant and the assailant began to beat him on the head and the sidewalk. Cannon said that he tried to call for help when one of the men struck him in the mouth with either a club or blackjack. Dr. Gurtov communicated with the police of the Bedford avenue station and half a dozen cops were sent out to look for Cannon's assailants.

WOMAN HOLDS A BURLAR.

He Had Gone Up a Fire Escape and Had Got Some Boots.

Charged with burglary in having entered the apartments of Mrs. Frances Morgan on the third floor of 909 Broadway, Williamsburg, by means of the fire escape Eugene Perse, 30 years old, who said that he had no other means of access, was examined by Chief Magistrate Kempner in the Gates avenue police court. According to Mrs. Morgan, the prisoner came into the cell of the apartment house and then to the courtyard in the rear, where he climbed the fire escape to her rooms. Perse, she alleged, removed a window screen and after heaving himself up to \$13 in cash which was in her purse and to a gold watch and chain worth \$50 started to leave the building by the fire escape. Perse as he was leaving and demanded to know what he was doing. Perse tried to brush her aside, but the woman held on to him and called for help. A number of the tenants went to her aid. Perse tried to fight to effect an escape, but Mrs. Morgan held him until Policeman Seider came from the Vernon avenue station. Perse was arrested in the courtyard and taken to the police station where he was charged with burglary and entered a plea of not guilty.

UNLAWFULLY ARRESTED.

Magistrate Applies Mayor Garner's Test, but Doesn't Let Man Go.

Magistrate Butts announced at a hearing in the Yorkville police court yesterday that where a policeman attempted to arrest a person on a complaint of misdemeanor without a warrant that person was justified in resisting arrest.

The Magistrate did not express an opinion as to whether the person might legally do if the policeman gave him a ray on the head with his nightstick for resisting unlawful arrest.

Thomas F. Butler, East Thirty-sixth street, was arrested by Policeman Sixty of the East Thirty-sixth street station. The policeman said that Mrs. Forrester told him that Butler had been arrested by a policeman and that he had been taken to the police station.

It was an unlawful arrest, the Magistrate said, but he said that the policeman was justified in using force to get the man out of the house.

A man about 40 years old jumped from the drawbridge over the Harlem River at Tenth avenue and Fifth street last night and was killed. The man, who had been drinking, was seen by a light gray and dark brown coat and a light gray and dark brown coat. He was seen by a light gray and dark brown coat and a light gray and dark brown coat.

President Hayes's Birthplace Burned.

DELAVAR, Aug. 7.—The birthplace of President Hayes, a small wooden building on the site of the old Hayes farm, was destroyed by fire to-day. It was a two-story brick and was 100 years old. It was owned by W. C. Evans, a candy manufacturer. The blaze was caused by a defective fuse.

AN ANALOGY.

Rome conquered the known world, but was herself conquered when she sent hirelings into the field.

In other words, Rome made the mistake of employing too many sub-contractors in her military operations.

And some owners make the mistake of having too many sub-contractors on their building operations.

This defeats Economy, Quality and Speed—and depletes the income on the investment.

We do more actual building than any of our competitors.

The inference is obvious.

MAY NAME CARDINALS SOON

ROME ADVICES INDICATE CONSISTORY IN FALL.

Little Hope That American Will Be Named But Honor May Come to Archbishop of Montreal—Ten Prelates Have Died Since Last Consistory Was Held.

Private advices have been received in this country and confirmed by the Rome correspondents of the higher class of Catholic journals to the effect that Pope Pius X. has intimated that the long heralded consistory will be held next November. It is of particular interest to this country and Canada, for although it may happen that no American prelate will be named to the senate of the Church, it seems a certainty that the Apostolic Delegate at Washington, Mgr. Falconio, will be among the new Cardinals.

Some estimate that the Pinal Legate, Cardinal Vannutelli, may be the bearer of a private communication on this subject to Mgr. Bruchesi and that it will be made known at the consistory. At all events the Pope has been at pains recently to show his fondness for the Archbishop of Montreal. At the latter's request, Mgr. de la Riviere, Demarey, a Canadian, a Papal Chamberlain and ordered him to be attached to the escort of the Cardinal Legate, Demarey, and Thomas Hughes, Kelly, who will be the secretary of the Papal Legation. There is not the least hint of another American being in the list of coming Cardinals. This is variously accounted for. It is taken for granted that the Nuncio at Vienna, Mgr. Granito Belmonte, and the Patriarch of Lisbon, Mgr. Mendes Bello, will be the two new Cardinals.

In the case of Mgr. Belmonte the Pope, it is understood, is quite willing to give him the hat, but the Emperor Francis Joseph, who is the patron of the Nuncio, still holds a tight rein on his ancient prerogative of suggesting this one or that one for special honors. Rome usually looks at the consistory with a jaundiced eye, though the Sacred College did object when that faculty ventured to use the power of veto at the consistory of 1903, when the Nuncio at Vienna, Mgr. Aehrenthal, by his condemnation of Prof. Waldmuller, and since that incident Austria has shown no disposition to get the initiative in the matter of getting him the coveted honor. Mgr. Bilelli, the Pope's majordomo, Mgr. Lagaria, the Nuncio at Rome, and Mgr. Della Chiesa, Archbishop of Palermo, among those mentioned by persons close to the Vatican again, too, the name of the Archbishop of Westminster is brought forward. It is said that the Pope has been patiently waiting for some recognition.

No fewer than ten Cardinals have died since the last consistory, at which several were named. At present the Sacred College consists of fifty-two prelates of the Church, twenty-three of them residing in Rome and twenty-nine in various congregations, tribunals, etc. thirty-one are Italians, two are Germans, four Austrians, two Hungarians, four Spaniards, one French, one Swiss, one from the United States, Australia, Belgium, Brazil, Portugal and Ireland. All but five of the Cardinals have received the papal blessing at one of the consistories of the religious orders in the college is two for the Friars Minor and one each for the Benedictines, Augustinians, Carmelites, Carmelites and Capuchins. Of the present College of Cardinals, the one created by Pius IX., thirty-six by Leo XIII., and fifteen by Pius X., Cardinal Granito Belmonte, rephrased of Vienna, is the eldest member. He will be 84 years of age. The Papal Secretary of State is the youngest. He will be just half the age of Cardinal Granito Belmonte.

AUTO SMASHED AT BRIDGE.

Young Owner Says Father Is a Long Island Brewer Now in Europe.

DOVER, N. J., Aug. 7.—A \$5,000 Packard car, new, was smashed late last night as the result of the bursting of a tire and the bridge over the canal at Kenilworth, about four miles west of Dover, was damaged. Three young men in the car, none over the age of 20, were killed. Their names, only one was injured and his hurts were not of a serious character. He was fixed up by Dr. Harvey Upchurch, who had witnessed the mishap from the veranda of the Kenilworth Hotel, within a stone's throw from the scene of the accident.

The car, bound for Mount Arlington, was running at a fifty mile clip, it is said, and as it neared the canal bridge, the approach to which is very steep, at the crest of the incline a tire burst and in the next instant the car skidded against the bridge railing on one side, partly wrecking the car. When the car came to a stop it was turned backward, which was the direction whence it had come. Two of the three occupants, had sat in the front seat and the third was out of the car and severely injured and somewhat lacerated.

The youth who said he owned the car, Dr. Upchurch, said that he was a Long Island brewer and that he was now in Europe. He was hailed off the bridge where he was killed and was left by the roadside. The occupants of the car after the accident were taken to the hospital and the car was towed away to be removed and the bridge was closed for some time.

President Hayes's Birthplace Burned.

DELAVAR, Aug. 7.—The birthplace of President Hayes, a small wooden building on the site of the old Hayes farm, was destroyed by fire to-day. It was a two-story brick and was 100 years old. It was owned by W. C. Evans, a candy manufacturer. The blaze was caused by a defective fuse.

RICE MURDER STUMPS POLICE

ROBBERY AND REVENGE ALIKE SEEM IMPOSSIBLE MOTIVES.

Robbers Could Have Got an Envelope Full of Bills in Moment's Search. He Had Quarreled With Italian Mrs. Rice and Children Arrive Home.

CLEVELAND, August 7.—The murder on Friday night of William L. Rice is likely to go unsolved. To-night after working two days the entire force of detectives and police are very nearly worn out.

For a time the detectives worked upon the theory that the murder was prompted by business enemies that Rice had made. The theory was exploded early to-night and nothing further along this line will be done, for the present at least.

The widow of the murdered man and her four daughters arrived from their summer home in Massachusetts shortly before noon to-day, five hours before they had been expected. They were hurriedly driven to their home, which has been guarded all day by a policeman. No one except Rice's most intimate friends were admitted.

Accompanying Mrs. Rice and her children was William Nelson Cromwell. "Mr. Cromwell is here because he was Mr. Rice's Eastern associate in numerous financial deals," said Attorney Frank Ginn, one of Rice's partners. "He is to take charge of their associate affairs."

The theory of murder for revenge is unsupported by anything tangible. That of death at the hands of footpads who the victim resisted is the only one left. But the fact that no article of value had been taken from Rice's body left, that theory nothing but a theory.

The husband of searches would have disclosed the envelope filled with bills in his inner pocket. A hand plunged into a trousers pocket would have found silver. It would have been a moment's work to have stripped Rice of his jewelry.

The autopsy yesterday showed that only one of the two bullets fired at him penetrated the brain. The second glanced off. It was discovered that he had been struck on the head with some heavy instrument, possibly a blackjack or pistol. The coroner expressed a belief that the shot was fired after he had been felled by the blow.

Evidently Mr. Rice put up a desperate fight for his life. Two clean cuts in the arm of his coat, felled, however, to penetrate the flesh and blood, were found. A clean deep cut in the back of the left hand reaching to the bone seemed to indicate that he had ward off one blow as a trained fighter would do. Probably while he was doing this he was knocked down.

The murderer evidently planned the crime with exceeding cunning. The spot selected was in the heart of the city, in an open boulevard directly under a light where any person desiring to reach the crowded street could do so without being noticed. This is especially true in the dense drainage, where the mean flow for the month of July will perhaps be 2 per cent. greater than for the corresponding month in 1909. The Hudson River streams have been from 15 to 25 and 30 per cent lower than in 1909 and if another drought comes, the water level will be even lower. The drought of last summer so depleted the subsurface water supply that it is now insufficient to equalize in any appreciable extent the flow of streams.

Based on conclusions upon data collected by the State by the United States Geological Survey in cooperation with the commission. The report for the month of July made by Mr. Covert to the commission indicates that while lack of rain has been felt the underlying cause of the unusually low water is found in the fact that this is the third successive dry year. The drought of last summer so depleted the subsurface water supply that it is now insufficient to equalize in any appreciable extent the flow of streams.

FEAR WATER POWER SHORTAGE.

State Commission Believes Situation an Argument for Storage.

Unless copious rains fall throughout the State in the coming month, manufacturers who are dependent wholly or in part upon water power will face a serious situation. Reports made to the State Water Supply Commission show that conditions are already serious and that in many places a shortage even of public water supply has occurred, while navigation has been impeded.

Investigations and measurements of stream flow have been made by C. C. Covert, district engineer in charge of the hydrographic work that is being done in New York State by the United States Geological Survey in cooperation with the commission. The report for the month of July made by Mr. Covert to the commission indicates that while lack of rain has been felt the underlying cause of the unusually low water is found in the fact that this is the third successive dry year. The drought of last summer so depleted the subsurface water supply that it is now insufficient to equalize in any appreciable extent the flow of streams.

The drought of last summer so depleted the subsurface water supply that it is now insufficient to equalize in any appreciable extent the flow of streams.

Based on conclusions upon data collected by the State by the United States Geological Survey in cooperation with the commission. The report for the month of July made by Mr. Covert to the commission indicates that while lack of rain has been felt the underlying cause of the unusually low water is found in the fact that this is the third successive dry year. The drought of last summer so depleted the subsurface water supply that it is now insufficient to equalize in any appreciable extent the flow of streams.
